JAMAICA CONSTABULARY.

Law 8 of 1867 constitutes an improved Police Force, designated the "Jamaica Constabulary." The new Police is, to a considerable degree, under Military organization, given to it in order to its greater efficiency as a protective force; but it is essentially a Civil Body and those constituting it are bound to discharge the duties which are imposed on Constables, either by the Common or Statute Law. The maximum strength of the Constabulary Force is as follows:—

One Inspector-General.	Fifteen Sergeants-Major, including
One Deputy Inspector-General.	One Depôt Sergeant-Major.
Five First Class Inspectors.	Thirty-eight Sergeants
Five Second Class Inspectors.	Sixty-nine Corporals.
Five Third Class Inspectors.	Two Hundred First Class Constables
Fifteen Sub-Inspectors.	Six Hundred Second Class Constables.

But the Law does not render it obligatory on the Governor to raise the whole Force, or continue it at the full strength.

The Pay of Officers is on the following scale:—

Inspector-General £850 per annum, including £320 as Director of Prisons, and an allowance of £1 15s. 0d. per diem when actually travelling on inspection, &c.

Deputy Inspector-General £350 per annum, and £1 per diem travelling allowance with forage allowance for three horses at 2s. 3d. each per diem and one servant's allowance at 1s. 6d. per diem.

Each First Class Inspector £300 per annum with forage allowance for two horses at 2s. 3d. each per diem, and one servant's allowance at 1s. 6d. per diem.

Each Second Class Inspector £250 per annum with forage allowance and servant as in the case of a First Class Inspector.

Each Third Class Inspector £200 per annum with forage allowance and servant, as above.

Each Sub-Inspector £130 per annum with forage allowance for one horse and servant, as above.

Each Sub-Inspector, when acting as an Inspector of a District, receives half the salary of a Third Class Inspector and half that of an Officer of his own grade, making a total of £165 per annum with forage allowance for two horses at 2s. 3d. each per diem and one servant's allowance at 1s. 6d. per diem.

The Officers of the Force and Sub-Officers of the rank of Sergeant-Major are provided with quarters or lodging allowance.

The following is the pay of the Sub-Officers and men:—

Depôt Sergeant-Major, 5s. per day.	Second Class Constables, 2s. 4d. per day.
Sergeants-Major, 4s. 6d. per day.	Water Police Sergeant, 3s. 6d. per day.
Sergeants, 3s. 6d. per day.	Water Police Corporals, 3s. per day.
Corporals, 3s. per day.	Water Policemen, 2s. 6d. per day, and 2d. a
First Class Constables, 2s. 10d., and 2s. 8d. per day, respectively.	day additional to each mounted man, whether of the First or Second Class.

No man is admitted into the Force except he produces a certificate from a Magistrate, a Clergyman, or other gentleman of position, testifying to his being of good character for honesty, sobriety, fidelity and activity, and that his companions are reputable and above suspicion.

No person is eligible to be a member of the Force who is not capable of reading, without hesitation, any printed or written document and of writing a fair hand. Candidates must also be of sound constitution, able-bodied, not below eighteen years or above thirty-five years of age, and not less than five feet six inches in height, and thirty-two inches around the chest.

The period of enlistment is five years, at the end of which time the constable has the option of re-enrolment for a further term of five years, which entitles him to participate in the "Pension Fund" toward which each member of the Force contributes eightpence in the pound of his pay. Prior to December, 1883, each constable re-enlisting after his first five years' service received a penny extra per diem from the Constabulary Reward Fund. The rules granting this allowance have been cancelled from the 1st December, 1883, reserving, however, the rights of those Sub-Officers who were already in receipt of the extra penny per diem. From the 1st January, 1889, this regulation has been entirely abolished, and a system of Good Conduct Badges (similar to that existing in the Army) introduced. Under the new regulation the holder of a Good Conduct Badge is entitled to a penny a day in addition to his ordinary pay.

No man of a higher rank than a Constable will be qualified for this distinction.

Fourpence per diem is stopped from each man for his subsistence while in Hospital, except his sickness has been brought about by his own indiscretion, in which case One Shilling and Sixpence per diem is stopped.

Each Sub-Officer and man receives annually from the Government one suit of clothes and a pair of boots, and is also allowed bed and bedding free.

No Constable is permitted to marry until he has completed four years' service.

RETURN showing the Strength of the Constabulary on the 31st March, 1897.

KINGSTON—		Accom.	Av. Att.			
East Queen Street ...		1,000	500			In many instances the average attendance appears very low, because the calculation is based upon every Sunday's attendance. Most of the Ministers have two or more Churches under their charge: consequently in the Minister's absence services are conducted by lay helpers frequently, and on these Sundays the congregations are usually much smaller than when the Minister is present.

REMARKS ON SQUATTING.

Squatting still continues to a great extent, but is being checked by the activity of the Government in forfeiting numerous parcels of unclaimed land which were taken up by squatters, who have in most instances become Government tenants, pending the final forfeiture of such lands, when they will be afforded the opportunity of becoming free-holders under the Government scheme for the sale of lands to small settlers on easy terms.

Two parcels of land in the Parish of Westmoreland, aggregating 11½ acres, and 3 lots in the City of Kingston, containing together 11,161 square feet, have been recovered from squatters under Law 43 of 1837 during the year 1896-97.

What is the source of the Water Supply ; the quality of the water ; and the amount of water available for each patient every day ?

The Hope River, Government Water Works. By analysis, good. The amount of water available per head is practically unlimited.

What is the number of—(I.) Lavatories ?

Two. Day is begun by a general bathing ; thereafter, during day, any washing is done under the nearest water-cock. In a special case, and for sick and helpless, hand basins are provided.

(II.) Baths ?

Six fresh water shower baths, three on male side, three on female side ; and one sea bath.

(III.) Latrines ?

In the Dormitories, dry earth chairs. Each single room has dry earth commode. Each Airing Court a latrine with several dry earth commodes ; but it is to be understood that the term "dry earth system" can be little more than a name here—for one thing—it will require more than two tons of earth daily to be used in the Lunatic Asylum.

What is the system of Sewerage ?

Hard to define. Open gutters and a short length of sewer carry foul and storm waters into harbour. The sewer is flushed by automatic syphons. Excreta and garbage carried in buckets to place of deposit from which it is removed nightly in carts by a contractor.

In reference to the above Table, state:—

I. By whose authority patients are restrained?

The Medical Officers only.

II. What kinds of mechanical restraint are in use?

Canvas camisoles with sleeves stitched to the sides.

III. Whether any, and if any, how many, cases of cruelty by attendants to patients have been brought to the notice of the proper authority, and what was the result in each case?

There were no cases of cruelty. The injury (3) done was accidental, and partly through resistance of the patients.

IV. What was the number of cases of injury to patients—(I.) By themselves?

26.

(II.) By other patients?

Are the patients, as a rule, given daily exercise, their health permitting?

Yes; they live in the open air, are given walks on the grounds.

Are they confined to airing courts, or allowed to walk in other grounds, and sent beyond the Asylum?

Allowed exercise in the Asylum grounds beyond the Airing Courts as much as possible.

Are any means taken to amuse the patients, or to induce them to amuse themselves? Detail them.

Newspapers, periodicals, or books, which have been presented to the Asylum Library and books purchased out of the Patients Fund, Bibles, Testaments, Hymn and Prayer Books are also distributed. Pipes and tobacco are given as indulgencies, and fruits when in season.

Occasionally music and magic lantern shows form part of the amusement of the Patients, as do "sports" in the grounds.

How many religious services were held in 1896-97?

Every Sunday, also Xmas day and Good Friday.

What was the average attendance?

Males 57, Females 70.

In what building, and how many could it contain?

There is no chapel. The patients are obliged to be congregated together under the sunshade of the Female A Ward which measures 123 ft. long by 36 feet wide. In wet and windy weather they are at times driven out of this place which is also used as a dining room.

Give the Daily Average Number of Patients who were employed in 1896-97.

			Agriculture and Gardening.	Trade.	Household Work, Drawing Water, &c.
Male	97	46	80
Female	14	90	140

NOTE—A rigid classification of employment cannot be observed, for the reason that patients who are put down as employed at Trades are engaged on domestic work up to 11 o'clock, and take part in other avocations after that hour and vice versa.

—Agriculture and Gardening are affected by tropical rains, or hot weather, when such employment becomes, to some extent, impracticable.

The stores are for the most part obtained under contract, the accounts for which are received and examined monthly by the Medical Superintendent, who draws orders on the Treasury in payment of the same.

In addition to the Blue Book Return the Medical Superintendent transmits to the Government an Annual Report embodying statistics, and the financial and general management of the Asylum.

Three. There is a Board of Official Visitors appointed by the Governor, meeting Quarterly, whose Reports are forwarded to the Government, after each Meeting. Notes of individual inspections of the Members, &c., are also forwarded as made.

QUESTION II., *continued*

(I.) What quantity of water is available for each patient every day?

The supply is continuous and practically it may be said that an unlimited supply can be had.

What is the source of the water supply?

The Government Kingston and Liguanea Water Works. The water is obtained from the Hope River, distant seven miles, is conveyed by metal pipes, and midway between the source and the Hospital undergoes subsidence and filtering in properly constructed filter beds.

What is the quality of water?

Though the quality of the water varies it is, as a rule, very good. There is no doubt that it experiences organic contamination between the source and the Water Works, and this contamination is greatly increased during the rainy season. The water is filtered in the Institution prior to consumption.

(II.) Detail the arrangements as to baths and lavatories.

There are four outside baths on the male side and two on the female side, all supplied from iron tanks connected with the water pipes. There is a fixed "Terra Cotta" bath (two for males and one for females) attached to the wards in each division of the Hospital supplied with hot and cold water. The outside baths discharge into a main drain through trapped pipes connected with each bath. Apart from these baths there is a lavatory attached to both male and female divisions.

(III.) What is the system of sewerage? and what the condition of the privies?

The surface and bath waters from female division and Theatre are carried off by surface gutters opening into the lanes in the vicinity. The surface and bath waters from male division, and the urine, are carried off in a main drain which discharges at a distance of half-a-mile from the Hospital, and which is trapped at both ends. This drain does not receive any faecal matter, and frequently flushed with clean water. Provision is made for mixing all faecal matter with fresh, dry, sifted earth and for carting it daily to a distance. The earth closet system is adopted in the wards as well as in the outside privies and is found to work very satisfactorily.
